

Appl. No. : **10/789,169**
Filed : **February 27, 2004**

REMARKS

Restriction to one of the following groups was required under 35 USC 121:

- Group I Claims 1-24, drawn to methods of assessing a single nucleotide polymorphism, classified in class 435, subclass 6;
- Group II Claims 25-33, drawn to methods of screening compounds using in vitro based methods, classified in class 435, subclass 325;
- Group III Claims 34-39, drawn to methods of screening compounds using a transgenic animal, classified in class 800, subclass 3.
- Group IV Claims 40-42, drawn to methods of making a pharmaceutical composition, classified in class 514, subclass 1;
- Group V Claims 43-48, drawn to methods of modulating hippocampal function, verbal memory or schizophrenia risk, classified in class 514, subclass 1.
- Group VI Claims 49-51, drawn to a pharmaceutical composition, classified in class 514, subclass 1.

In response to this Restriction Requirement, Applicant provisionally elects Group I, that is, Claims 1-24 with traverse. The Restriction Requirement is submitted to be improper because, according to MPEP 803, there are two criteria for a proper Restriction Requirement: (A) The inventions must be independent or distinct as claimed, and (B) There would be a serious burden on the examiner if restriction is not required. Here, the members of the group are sufficiently few in number that a search and examination of the group can be made without creating a serious burden on the examiner, thus restriction is improper and the requirement should be withdrawn.
